

GOVERNOR-GENERAL OF CANADA PAYS VISIT TO WAINWRIGHT

Town En Fete on Monday in Honor of Duke and Duchess of Devonshire and Party; Visitors Have Pleasant Time in National Park; Mayor and Schools Present Addresses, and the Cadets are inspected

Wainwright sure did honor to the king's representative, in the person of the Governor-General of Canada, on Monday last when he with his party paid a visit here for the purpose of sight-seeing in our national park.

The ensemble of the party, who arrived on their special train promptly at 12.15 noon, was as follows:—Their Excellencies the Duke and Duchess, Lord and Lady Harrington, Lady Maud Mackintosh, Lady Anne Cavendish, Lord Charles Cavendish, Miss Saunders, Capt. Balfour and Capt. Lloyd.

The cadet corps (nearly 40 strong) under Platoon-leader Ernest Kenny and the school children were all lined up at the depot and upon alighting from their car the party was greeted with a rousing "O Canada" from some 200 lusty young throats, the cadets meanwhile standing at the "present arms".

After Mayor C. T. Lally had been presented to the party, he read the following address of welcome from the citizens:—

To His Excellency The Duke of Devonshire, P.C., G.C.V.O., Governor-General of Canada, May it please Your Excellency We the Citizens of the Town of Wainwright, in the Province of Alberta, bid you hearty welcome to our midst.

We appreciate greatly the interest you have shown by your visits in the West, and assure you of our sincere good wishes for yourself and your esteemed life partner.

We learn, with regret, your intention to vacate the high office which you now hold, and trust you may be granted a long life, both for yourself, and for Her Grace, in your future estate.

Signed on behalf of the citizens of Wainwright,
C. T. LALLY, Mayor
The 25th day of April A.D., 1921

WEDDING BELLS

BRITTON-STOCUM

A pretty wedding took place at the St. Thomas church, Wainwright, last Thursday evening, April 14th, at 7.30 o'clock when Miss Mary Ernestine Stocum, of Condesport, Pennsylvania, and Mr. Howard L. Britton, of Viking, were united in wedlock. The ceremony was performed by the Rev. H. Wilson in the presence of Mr. Suckling, principal of the Wainwright schools, and Miss Broadie, and a few intimate friends. They returned to Viking Saturday evening and were met by a large crowd of young people who showered them with rice and old shoes etc. The newlyweds will make their home on a farm three miles southeast of town.

The bride is favorably and well known locally having come to Viking about five years ago with her parents, Mr and Mrs L. G. Stocum, who resided just south of town until last November when they returned to their former home in Pennsylvania. The bride expresses herself as being pleased to return to Canada to reside once more. She is a graduate of the Camrose Normal and taught several terms in neighboring schools.

The groom is the son of Mr and Mrs. Irwin Britton, respected citizens of our community, and has grown to manhood in this district where he has won the esteem of everyone for his many good qualities. In 1916 he answered the call of his country and joined the 202nd sportsman's Battalion. In France he served with the 50th Battalion until demobilization in 1919. He received wounds while on active service from which he has not yet fully recovered.

The Star joins with a host of friends and acquaintances of the happy young couple in extending congratulations and good wishes for a long and happy life.—Viking News

Miss Sybil McLeod, after being presented to the Duke by the Mayor then read the following address from the high and public schools:—

To His Excellency The Duke of Devonshire, P.C., G.C.V.O., Governor-General of Canada, May it please Your Excellency We the members of the Literary Society of the Wainwright High school would desire

to extend to your Grace a hearty welcome to our town.

We wish you and her Grace, along with the members of your family a pleasant time during your short stay among us, and would express the hope that it may be to you one of the "Happy Memories of this Dominion of Canada."

(Sgd) Sybil McLeod, President
W. T. Suckling, Principal

In replying to the addresses His Excellency said it gave him great pleasure to receive such a cordial welcome in the name of the King. He said it was a pleasure to make the trip and he was following out a secret desire to see our wonderful natural

herds in one of the finest national parks in the world. Regarding the office he was vacating, he had nothing but happy memories for his term of Governor-Generalship, and felt that the Dominion and especially the west was advancing by leaps and bounds. He had learned that the town and district had done its full share in the late turmoil and strife of the war and although there are many who mourn they had the satisfaction of knowing that the sacrifice had not been in vain, and that it had been made in upholding the greatest of all traditions—home and country. He was sure that his hearers would agree that the world was now sweeter and cleaner after the struggle, and was proud indeed to know that we in Wainwright had "risen at the call."

He congratulated the cadets on their smart appearance as well as the literary society and the whole school and closed by hoping that a holiday would be given the children in commemoration of his visit. He then called for and personally led "three cheers and a tiger" for the king, which was most heartily and lustily joined in.

The assembled children having sang "God save the King" the party drove off to the Buffalo park, the cars being kindly loaned by Messrs C. H. Rowe, H. L. Hoegh and D. Wiebe.

During an interval of the proceedings at the depot the Town Councilors and members of our citizens and their ladies had the pleasure of receiving a most

hearty handshake and greeting and the party displayed specially warm feeling towards the children, who all enjoyed their introduction.

During the afternoon the vice-regal party spent a pleasant time riding in the park and they were fortunate in seeing several large herds of animals all of which were viewed with delight.

The return to town, was made about five o'clock and a very fitting wind-up to the proceedings was the beautiful roast of real buffalo which graced their dinner table, this being a portion of a splendid 2-year-old beast which had been specially killed and dressed for the occasion, and which was presented under the following label:

"To His Excellency the Duke of Devonshire; with best compliments of the citizens of Wainwright."

EDMONTON ODDFELLOWS PUT ON DEGREES

Local Oddfellows had a rally on Monday last. The Edgerton team conferred degrees on several candidates and some excellent work was greatly appreciated by all present.

A "big spread" was afterwards enjoyed by the boys at the cafe.

FEDERAL GOVT. PUBLISH REPORTS ON OIL AND GAS

In response to numerous enquiries that have been received since the discovery of oil in Western Canada, the Department of the Interior at Ottawa has just published a report entitled "Oil and Gas in Western Canada."

This report contains a description of the area, a resume of the progress of development in the oil and gas fields, a synopsis of the Petroleum and Natural Gas Regulations governing the disposal of rights on Dominion Lands, and Regulations governing the sale of stocks, bonds, etc. It is accompanied by a map of the oil regions of western Canada showing railways and steamboat routes.

The Board of Public Utility Commissioners for the Province of Alberta, the Department of Mines, and the Mining Lands and Yukon Branch of the Department of the Interior, contributed valuable statistical information which has been embodied in the preparation of this report by the Natural Resources Intelligence Branch of the Department of the Interior.

That specific and authoritative information on the subject may now be had, will appeal to the prospect or, capitalist, and student of conditions in Western Canada. Copies of this report may be obtained free of charge from the Superintendent, Natural Resources Intelligence Branch, Department of the Interior, Ottawa.

TRAIL RANGERS & TUXIS HOLD SOCIAL EVENING

In connection with the National Indoor Athletic contest for Trail Rangers and Tuxis boys a social evening was held in the Methodist church on Saturday evening.

No contest was held on account of the removal to the farm of four of the Trail Ranger boys exhibitions of a potato race and the floor push were given.

The boys entertained with recitations and games, the evening being finished off with refreshments. A nice sum was netted for the Wainwright Trail Rangers Camp part of which will be sent to the Boy's Work Board of Alberta, an inter-denominational organization which is furthering Canadian Standard Efficiency Training in the province.

"AN ARABIAN NIGHT" ROMANTIC PICTURE HAS EGYPTIAN LOCALE

One of the most atmospherically correct productions of recent date is "An Arabian Knight," starring the famous tragedian, Essie Hayakawa, which will be the principal attraction at the Elite theatre on Friday and Saturday. This delightful story of adventure rests intriguingly in the narrow alleys of old Egypt, in the under-ground tunnels of Hashish dens, the elaborate homes of dancing girls, and the palaces of princes.

The sets in which a hashish den appears was actually excavated at a depth of ten feet and is an exact reproduction of just such a vice-ridden hole uncovered in Cairo, Egypt, recently. An interior of a Moorish palace is 100 feet deep by 50 feet in width. The cost of erecting these sets ran up to approximately \$15,000.

"An Arabian Knight" is a colorful comedy-drama. Mr Hayakawa is seen in the role of a dragonman, a "donkey" boy, whose extreme wit and cleverness secure for him the position of butler to a wealthy American visiting in Egypt. How he successfully dodges the wooing of a spinster of uncertain age who believes that he is the reincarnation of her lover of two thousand years ago, saves the American and his beautiful ward from death and incidentally wins for himself the girl of his heart, combine to make "An Arabian Knight" one of the most delightful pictures in which Mr Hayakawa has appeared.

When strangers come to town use them well.

GLARE LIGHTS CHECKED

Glare lights on motor cars are being checked up by the police these days. Eight offenders were arraigned in court before Magistrate Sanders on Friday morning and fined \$1 and costs. The law respecting headlights and the Motor Vehicle Act requires that no direct rays of light from the lens shall measure more than 45 inches from the ground at a distance of 75 feet from the car. Several different lenses are being offered for sale on the market today and motorists are advised by the police to equip their cars to avoid prosecution.

NEWSPAPER MEN GATHER FOR REAL BUSINESS PARLEY

On Saturday night last, publishers from Tofield, Chauvin, Viking and Wainwright, met at Tofield and organized a district association affiliated with the provincial and Canadian Weekly Newspapers Association. Matters pertaining to job printing were discussed and a new price list compiled for both advertising and job printing as well as other important matters regarding the profession generally. M. L. D'Albanson of the Chauvin Chronicle was appointed convenor of the new District No. 2 (which comprises the territory on the G. T. P. from Edmonton to the boundary east) and Mr W. Worton of the Tofield Mercury was elected secretary.

The Viking News and The Wainwright Star were among others represented. Before the commencement of the session the whole party was entertained by Hostess Mrs. W. Worton, who put up a regal spread worthy of her fame.

ILLUS. LECTURE AT GRACE METHODIST CH.

On Friday evening last an illustrated lecture was given in Grace Methodist church by Mr. J. A. Irvine, Alberta secretary of the Navy League, the work of the navy during the war and the assistance given by the Navy League in the repatriation of sailors and the care of widows and orphans was the theme of the address.

Over 200 pictures were shown many of them taken in action on sea and in the air.

A number of interesting views of the camp for boys held last year at Sylvan Lake Alberta were also shown, the lecture was held under the auspices of Miss Torg's C. G. I. T. class.

IMPORTANT CHANGES ON SUNDAY NEXT IN THE TRAIN SERVICE

A general change of time over the G. T. P. section of the Canadian National Railway system will become effective on May 1st, according to an announcement by the passenger agent.

Following introduction of the new time-table, the continental coast-to-coast train will arrive at Edmonton at 6.15 a.m., and depart at 6.45, arriving Winnipeg the following morning at 10 o'clock. Westbound, this train will reach Edmonton at 11.20 p.m., and depart for Vancouver at 11.50 p.m.

This will mean that No. 1 and No. 2 will arrive at Wainwright at approximately the same times as are now in force.

New local train services will be established between Wainwright and Saskatoon, these trains leaving town about 6 a.m. each way and the return train making arrival here somewhere around 11 p.m. daily.

This is an appreciable change providing as it will for several hours in the city and a round trip in one day.

ALTERATION OF SERVICES AT ST. THOMAS' CHURCH

The following are the changes of Holy Communion services in St. Thomas Anglican church during the summer and autumn months from May 1st. Holy Communion will be administered 08.30 to 09.00 a.m. on the second and fourth Sundays of each month at 10.30 a.m. Litany and Holy Communion service will be combined on the second Sunday of each month.

NEW DANCING PAVILION AT BANFF SPRINGS

A large new dancing pavilion to be known as "Cascade Hall" is now in course of erection at Banff, immediately adjoining the Alberta hotel on Banff avenue.

There will be a large basement which will contain dressing rooms and the main floor of the hall will be divided into a large central dance floor, with supporting pillars down each side, and between these pillars and the outside walls tables and chairs will be placed and light refreshments served to those desiring same.

Cigar and Confectionery counter will also be operated in connection with the Hall. It is expected that the building will be completed by the beginning of May.

When strangers come to town use them well.

Support your local institutions that benefit your town.

THE WHY AND WHEREFORE OF THE INCOME TAX

It is generally realized that revenue for carrying on public affairs and paying interest on our war debt, must be provided and for doing this the income tax has much to recommend it. But the method of collecting might be improved. The government in this matter acts in a paternal capacity, but the average individual is beginning to realize that this paternal government is a grandfather in his second childhood. It has too many second thoughts and requests for additional information. Filling out an income tax return is quite a task for the average individual, but in most cases all the information asked for is given and an honest return filed. But that is not the end of the matter. Very often the tax payer is bombarded for additional information. Some of these requests appear to question one's honesty when the Government sent out forms to be filled in it would appear reasonable to expect it to accept the information tendered except in cases of palpable error. If it is not the intention to accept the information filed, then some other means should be devised for getting it. In the majority of cases the individual feels that he is burdened by an unjust tariff tax. Why proceed to make them sore by the manner of collecting the income tax, a tax which is considered reasonable and just?

Why not bring the tax-payer and tax collector face to face. This long range business is not satisfactory. Why not appoint some man in each municipality or district, the secretary-treasurer of the municipality, a banker lawyer, or other competent party, before whom one could appear and file his income tax return, between certain fixed dates after the New Year? Many persons at the present time have lawyer or banker fill out their returns. Under the suggested arrangement an individual would bring the necessary information and with the assistance of tax collector, make out his return. The collector would calculate the amount of tax due, if any, the person pay his tax, get his receipt and copy of return, and the matter would be ended for a year. In case of dispute or mistake the right to appeal should be the privilege of either party.

FOURTH SESSION PROV. LEGISLATURE HAS NOW ENDED

The fourth session of the fourth legislative assembly of the province was brought to close Tuesday afternoon last after a long and interesting session extending over a period of exactly nine weeks, the house having assembled on February 15th.

His Honor, the Lieutenant Governor gave final assent to the voluminous list of bills at 5.45 o'clock, the first of law-making comprising nearly eighty public bills, with fifteen private measures attached. However, a number of bills were withdrawn and the house later on killed two others in committee in addition to the heading others earlier in the session.

Following prorogation, the Liberal members of the legislature assembled in the executive committee chamber and presented Premier Stewart with a handsome gold watch and chain, as a token of their appreciation for the capable and considerate manner in which he had presided over the house during the very trying session. Premier Stewart accepted the gift with a short speech in which he voiced his deep appreciation of the thoughtfulness shown not only by the presentation and the good wishes attached, but by the loyalty and support extended to him during the session.

THE GRIM REAPER

It is our sad duty this week to chronicle the death of Mrs. Nora McLeod, wife of Mr. F. E. McLeod, who passed away at the isolation hospital in Edmonton on Wednesday morning at the age of 37 years. The funeral took place at the Beechmont cemetery in the city on Friday last. Deceased leaves to mourn their loss her husband and six children to whom the sympathy of a large circle of friends is extended.

HUGO CHANNEL

There passed away on Tuesday morning last at the General hospital in Edmonton, Mr. Hugo John Channel, at the age of 26 years.

The deceased, who was taken to the city some few days ago, suffering from pneumonia, was a native of London, Eng., and came to this country some ten years ago in company with Mr. R. Aykroyd. He has been employed as a warden in the Buffalo park for several years past.

The funeral which is in the hands of the McLeod parlors takes place this (Wednesday) afternoon at the Wainwright cemetery.

Good roads mean money in the pocket of every automobile owner. They mean comfort to the body of every automobile rider. Efficiency and economy of operation pay large and certain dividends on every dollar. As these improvements are extended even the man who neither drives nor rides on the open highway will take his profit from improved transportation of farm products and more rapid and economical communication in business and industry.

Look ahead of self when all the town is to be considered.

WAINWRIGHT, ALBERTA, APRIL 27th, 1921.

CLEAN UP WEEK

A PREVENTATIVE

We hear a great deal to-day of the necessity of additional production, but we hear too little of the necessity of the prevention of waste.

The fire loss of the Dominion in 1920 was approximately \$27,400,000 equal to about \$3.42 per capita on a 8,000,000 population, or \$17.10 per family.

The loss of life and the injuries sustained largely through carelessness are beyond calculation, while our per capita fire waste in this country is about six times that of Europe. Are we to allow this condition to exist, when young and old, rich and poor, strong and weak, can each take an active part in assisting to protect the lives and resources of our people?

Would not then "Clean up week" reveal the occasion for a general get-together by removing existing hazards from, and around our homes. This can so much more easily be done during the spring-time cleaning.

The attic, cellar closets, yards and outbuildings should be thoroughly cleaned, and all useless material, and rubbish removed, or destroyed. Store the remaining articles neatly away.

Only waste or rags used in polishing furniture should never be left around the house, as they are liable to cause a fire from spontaneous combustion. An oily mop has been known to ignite from spontaneous combustion within one hour.

No matter if in home or factory the furnace or boiler room should be the acme of cleanliness. Great care should be exercised in cleaning chimneys and stovepipes, which will have accumulated quantities of soot during the winter months.

There is absolutely no reason for a back yard full of broken boxes, packing material, bottles, paper, and manure. Piles of old ashes dumped near your house. A barn full of accumulated old rubbish you will never use.

Each citizen in Canada is responsible in part for the high insurance rates existing, but can help reduce this cost of insurance by preventing fires.

CITY AND COUNTRY INDEPENDENCE

There seems to be a very decided tendency in certain quarters to widen the breach, which unfortunately already exists in only too many cases, between the city and the country. The farmer is told that the city people live in luxury, working little and playing much, and they are doing it all out of the ill-gotten profits which they have wrung from the helpless and hard-working farmer.

And the city man is told that the farmer does not care a fig whether the city children suffer for lack of food or not so long as he goes on adding to his swollen bank account. The farmer is being taught that if the city thrives it can only be at his expense; and the city worker is told that if the farmer had his way his wages would be ground almost to the point of starvation. The farmer gets the idea that the worker in the city is much more anxious for his pay check than he is for work, and that he really deserves to starve; while the city worker is told that the farmer is the hardest of hard masters, and sees no farther than his nose.

We have been following for years the papers of our country, and it seems to us that never before was there quite such a concerted and successful effort to drive a wedge between city and country as at this present time; and the effort is a most unfortunate and mischievous one, whose success can only result in serious damage to both city and country. The city cannot get along without the country and the country cannot get along without the city. Of course the city could live if the farms were deserted, for they could import what they wanted, and export what they produced; and the country could live on what it produced itself; but such a consummation is desired by no one. Most of us will agree that we need both the farmer and the artisan, and even the much maligned manufacturer.

These are strange times, and both rural and urban life are passing through disagreeable experiences, which will probably continue until deflation has been accomplished and we have settled down once again to normal conditions, and the length of time it will take to accomplish this depends upon Europe even more than it does upon America. It is well to remember that the United States is passing through a similar time of testing, and the conditions in Europe are impressively worse than upon this continent. We need patience and faith, patience to bear our burdens without murmuring, and faith, unlimited faith, in the solvency of our country and the assured greatness of that country's future.

Perhaps it will be easier to be patient if we try to secure broader vision. The man who writes intimating that every woman in the city does her washing by electricity simply does not know what he is talking about; and the man who intimates that every farmer is getting rich has evidently not been near the average farm.

It is true that there is a natural assemblage of wealth in the city, but it is not true that the city dwellers are rich, not by a very long way. We called attention only last week to a startling table which declared that at the age of sixty-five no less than eighty-four per cent of the workers in the United States were dependent upon other for support. There are wealthy men in the city, but they are comparatively few. And along with this goes the other statement that probably a good deal less than fifty per cent of our farmers are making money on the farm. But it is not going to help things at all by endeavoring to set city against country and country against city.

Most far-seeing men are concerned over the evident cityward drift of our population, and its inevitable implications; and we should aim to check this if at all possible. But if we want to get our city youth to the farm, or even if we wish to keep our country lads on the farm we shall never succeed from which to stay away, and the city is the only place to get rich and have a good time. The city has its advantages, but the farm also has its own advantages, and it should be our aim to paint things as they really are. How many farm boys would make for the city if they thought that at fifty-five or sixty years of age they would be dependent upon others?—Christian Guardian.

TEN COMMANDMENTS

OF TREE PLANTING

1.—Do not allow roots to be exposed to drying winds, sun or frost.

2.—Prune, with sharp knife, any bruised or broken roots.

3.—Have the holes large enough to admit all the roots without cramping.

4.—Plant in good loam, placing thoroughly decomposed manure at the bottom.

5.—Do not allow any fresh manure to come in contact with the roots.

6.—Spread the roots out in their natural position, and work fine loam among them, making it firm and compact.

7.—Do not plant deeply. Let the upper roots be about an inch lower than they were before.

8.—Remove all broken branches and cut back at least one-half the previous year's growth of wood.

9.—If the season is a dry one, water thoroughly twice a week.

10.—Keep the soil in a good degree of fertility. Mulching in the fall is beneficial.

FOR SALE—Pure-bred Barred Rock Hatching Eggs; Manitoba college and experimental farm strain; cracker jacks; \$2.50 for 15—E. Walker, Sidney, Manitoba.

**HOPKINS' IDEAS ON
THE PRINTER AND
WEEKLY NEWSPAPER**

An aggressive country weekly can make a community, or lack of it break a community. It can lift a struggling neighborhood up to prosperity. It is the tie that binds the home, church and school together. This is the opinion of A. W. Hopkins of the Department of Agricultural Journalism of Wisconsin College of Agriculture.

"Once established, the country weekly can be of great assistance in making a live community," he says. "Backing all the valuable and worthwhile social or business enterprises is a regular part of its duties. Many a success has been built because of the country weekly," says Mr. Hopkins. "Printing a record of all births, deaths, marriages and the various fortunes of its readers will help make a place for itself in the homes of its readers."

When people want to interest distant friends in their home town they send away copies of the local paper.

When anyone wants to know what kind of a place a distant town is he sends for a copy of the local newspaper.

When the merchants are full of courage and advertise freely, an impression is created among the many people living outside of town who see the paper that this is a wide-awake little business town. If at times the merchants let up a little on their advertising, the town does not look so good to outsiders.

In supporting the home paper, therefore, you not only get the local and business news, but you help on all civic causes, you are enabled to participate to the fullest extent of its life, and you help the town exert influence and create a favorable impression outside.—Successful Farming.

Fifty American farmers arrived in Winnipeg recently from Iowa, Minnesota, North and South Dakota, Illinois and Wisconsin en route to western points, the majority of whom emigrated to Canada as a result of having friends in the west. They claim a large number of farmers in the United States are contemplating coming to Canada as soon as present holdings can be disposed of.

WHAT TO DO

Farmers all over the country are now out looking the skies over so that they can forecast the future of the business. What will be our luck this season? Are we going to go ahead and grow big crops again in spite of the decrease in the prices enjoyed in recent years? These are some of the questions men are asking themselves.

It is all right to ask questions, too. But this is no time to stand still and wait for an answer. Every individual must answer these questions for himself. Nobody else will answer them for him. And in working out the solution to the problems which loom up just two things are sure.

The first is that looking on the bright side of things will help more than anything else to get around on the right side of success. No man can do his best and be all the time timid and fearful and full of forebodings. He must take the best possible view of matters, push on and out and work just as if he expected to win the very best there is.

The other thing is to talk success. Nothing helps more than a cheerful, courageous, optimistic spirit. But to make it count for most, we need to let it out. It is the steam that pushes out of the boiler which works the piston in the cylinder. A well-founded trust in one's own self and a sure confidence that all will work out right—if we work it out right will inspire our fellows only if we talk it and write it and act it out in everything we do, from seeding time to harvest.

**SPRING PLOWING
AND SEEDING!**

Dear Sir—The use of the Tractor for spring plowing will reduce cost and increase yields to such an extent that some farmers would be justified in buying a Tractor for that purpose alone.

This may seem to be an extravagant statement, but nevertheless it is true. Why? Plowing is the slowest, most expensive, and, in practically all districts, the most important operation in preparing stubble land for seeding. The most important advantage the Tractor possesses for this work lies in the fact that it does the work more quickly than it can be done with horses. With the plowing done, the other work is easily accomplished. Early seeding is possible, and for that reason yields are increased. In addition to getting the work done earlier, the Tractor will plow at a smaller cost per acre than will horses. The importance of spring plowing lies in the fact that if it is properly done "at the right time" it contributes greatly to the water holding power of the soil, thus reducing loss from drought.

Wherever possible the land should be disced before plowing. This will cause weeds to germinate and when plowing is done the disced surface makes a good contact between the furrow slice and the soil below.

Deep spring plowing is not necessary. All furrows should be turned over flat so as to leave no air spaces. The work should be done with all possible speed, so as to avoid delay in seeding.

It is generally advisable to follow the plow closely with a Drag Harrow. Sometimes the Packer can be used instead of the Harrow. In any case spring plowing must not be allowed to stand untouched for any length of time, because in such a case the soil will dry out to the full depth of the plowing. Seeding the spring plowing should follow soon after plowing.

If wheat is seeded, the rate should be lighter and the depth greater than on summerfallow.

It is often advisable to pack spring plowing immediately after seeding. If packing is done it should not be delayed.

As a general rule oats and barley are seeded on spring plowing in preference to wheat. Oats should be seeded at the rate of from two to three bushels per acre, and barley from 1½ to 2½ bushels per acre. Rates of seeding rates are governed by the same factors which govern rates of seeding wheat. The size of barley seed is more variable than that of the other cereals, consequently must be seeded heavier than small seed varieties. The same relative advantages that we secure from early seeding of wheat are secured by the early seeding of oats and barley and more-over, if seeding is done early, it is possible to plow the summerfallow early, which results in higher yields of wheat the following year.

The advantage of the Tractor, in preparing stubble land for seeding is clear. Compared with horses, the Tractor will accomplish more work in a given time, at a lower cost per acre, and thus the double advantage of increased yields at a lower cost is secured.

**LETTERS TO
THE EDITOR**We are not responsible for opinions
expressed by correspondents**WANTS HALF HOLIDAY**

The Editor,
In the latest issue of a weekly paper published in one of our Alberta towns occurred a public notice that the merchants of that town had agreed to close their places of business at the hour of 12 noon on Wednesday of each week, during the months of May, June, July, and August, except where a legal holiday intervenes in any one week, such as May 24th, July 1st.

May I suggest, through your valuable organ, that the merchants and other employers of Wainwright should similarly close their places of business for one afternoon a week, during which prevails in a large number of cities and towns of Alberta.

In support of this I would advance two opposite arguments to suit differing points of view, and leave readers to choose the argument which fits their case.

1. We are the hub of the universe. Life here is lived at such a pace that we urgently need a half-holiday off in summer to enable us to stay with it.

2. We are a good little town but we can easily get the business we do in 5½ days a week, and pack our slack time into a real half-holiday.

For 5½ months, Mr. Editor, we have been breathing furnace-heated air; now their lies before us summer with its fleeting months.

Let us get as much of God's fresh air as we can. Let us have one half-holiday off on a week-day when the young men and maidens can rejoice on the tennis court or in the flivver; when the gardener can hie him to the potato patch; and when the golfers (rumored to be organizing) can rend the air with eloquence and divots. And once decided on, let the weekly summer half-holiday be kept, even though some erring storekeeper does surreptitiously sell a can of tomatoes to an importunate farmer.

Will you not, Mr. Editor, use your undoubted influence to bring in this reform. The writer is neither a property-owner nor an employer and therefore his voice carries no weight. There must, however, be men of influence in the town who desire to see this reform; let them advocate it.

Yours truly,

O. ZONE

ADVERTISING PAYS

Dear Sir—I was very much pleased to see the "Financial Statement" of one of our local institutions in the last Star and believe, in the interests of those who are called upon each year to support affairs of this kind, that financial statements of last year's baseball and hockey clubs as well as the Chautauqua held in your town last summer should be published. Trusting to see these statements in print at an early date.

"Interested"

**SOWING GOOD CLEAN
SEED PAYS IN RESULTS**

Increasing the acreage of crops grown on the farm does not always mean greater profits. The latter, per acre, are very frequently increased. If the yield, per acre can be increased without raising the cost of production the increase in yield will all go towards increasing the net profits. Let us assume, that a farmer's wheat crop yields 24 bushels per acre, and that it takes 20 c of the 24 bushels per acre to pay rent or interest on capital invested, and the cost of preparing the land, seed harvesting, threshing, etc. This would leave 4 bushels from each acre as the net profit.

On a large proportion of Canadian farms uncleaned or improperly cleaned seed is sown. There is no excuse for sowing so much dirty and poorly graded seed. The fanning and grading can be done in the slack time and well ahead of the busy spring seeding. This grading would not add to the cost of producing of the crop and the larger yield secured would substantially increase or, in many instances, double the net profit. Experiments conducted with oats at Guelph over a period of seven years showed the following results:

Large seed ... 62 bush. per acre
Medium seed ... 54 " "
Small seed ... 47 " "

Similar experiments with wheat, barley, rye and peas gave much the same results in each case. The small, shrunken and split kernels are much more valuable for feed than for seed. Another great advantage obtained by fanning and grading the grain for seed is that weed seeds are cleaned out.

UNION BANK OF CANADA

Wainwright Branch, G. C. Siddall, Manager

HERE ARE EIGHT WAYS TO KILL AN ASSOCIATION

- 1.—Don't come to the meeting.
- 2.—If you do come, come late.
- 3.—If the weather doesn't suit you, don't think of coming.
- 4.—If you do attend a meeting, find fault with the work of the officers and others.
- 5.—Never accept office, as it is easier to criticise than to do things.
- 6.—Nevertheless get sore if you are not appointed on a committee but if you are, do not attend the committee meetings.
- 7.—If asked by the chairman to give your opinion regarding some important matter, tell him you have nothing to say. After the meeting tell everyone how things ought to be done.
- 8.—Do nothing more than is absolutely necessary but when other members roll up their sleeves and willingly, unselfishly use their ability to help matters along, howl that the association is run by a clique.

KILL GOPHERS EARLY

Poison the gophers early. A pair killed in early spring means as much as ten killed in June. When gophers come out in April they take poisoned bait readily. An excellent receipt for preparing poison is as follows: Dissolve 2 ounces of strychnine crystals in equal part of vinegar and water one quart of each. When dissolved add sugar to sweeten it well and enough wheat to soak up all the liquid. Let the grain stand in the liquid for 2 days, and then set it out for the gophers. This makes strong bait and one kernel will kill any gopher that samples it. The main point in poisoning gophers is to get the poison out early in the spring. No use waiting until June when the land is infested with the rodents: kill them before they breed.

MORTGAGE SALE OF FARM PROPERTY

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act," under a certain mortgage there will be offered for sale by public auction.

At the Town Hall, in the Town of Wainwright, in the Province of Alberta, on

SAT., THE 14th DAY OF MAY, 1921, at the hour of 12 o'clock noon, the following property, namely:

The South-east quarter of Section Thirty-four (34), Township Forty-three (43), Range Six (6), West of the Fourth Meridian, excepting mines and Minerals.

TERMS: Fifteen (15) per cent. cash at the time of the sale and the balance according to conditions to be made known, at the time of sale or upon application to the Vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save the reservations contained in the original grant from the Crown and in the existing Certificate of Title appearing, and taxes for the current year, and to a lease for 1921, which will be produced at the sale.

The Vendor is informed that the above property is situated about 3½ miles from station and church, and 2½ miles from school that there is on the land an 8 roomed house, 30x36; a stable 40x40; a granary 24x40; that 95 acres are fenced and that the soil is light loam and sandy; that 95 acres are cultivated and that there is a deep well on the land with a good supply.

For further particulars and conditions of sale apply to STEPHEN R. BOWERMAN Wainwright, Alberta, or to McDONALD & TIGHE, Vendor's Solicitors, Imperial Bank Building, Edmonton, Alberta.

Approved: H. J. Dawson, Registrar (Seal) 11-5c

THE RED CROSS PHARMACY

Second Avenue Wainwright

FEED WHAT YOU RAISE & RAISE WHAT YOU FEED

During 1917, 1918 and 1919 it was not good advice to tell a man to feed his grain. Selling it was better policy as inflation had boosted grain so high that ordinary farm economies were entirely disrupted.

Even when hogs touched \$24 there was very little profit then and when they dropped back to \$20 the value of feed was at its peak. At the close of 1919 wise farmers reduced their hog and beef stock holdings to a minimum only guarding their breeding blood and sold their grain as well.

These men saw deflation ahead and are now replacing the disposed stock with new purchases at deflation prices, the difference between inflation and deflation reposing comfortably in the bank. But we are now getting back to normal—not pre-war normal, which we may never see again, but the real stable conditions upon which all business will have to be done in the future for many years. With the return of normal conditions is coming the period when it will again be good business to feed what you raise and raise what you feed.

O. J. Elder made a business trip to Heath last week in the interests of his Fordson agency.

SUMMERFALLOW SUBSTITUTES (Experimental Farm Notes)

For about thirty years the summerfallow at least once in three years has been the basis successful grain growing on the prairie. Under this system of tillage, moisture was stored up one year to permit of a profitable crop of grain the next. During the last five or six years, however, it has been generally admitted that this system of farming destroyed the root fibre which bound the soil together and made it liable to blow. This fact, coupled with a growing demand for feed for live stock, has led to the investigation of various points, both in Canada and the northern States, of crops which would profitably replace at least part of the summerfallow each year and still allow the storing up of sufficient moisture for a paying crop the following year.

Among the crops which may be profitably used in this connection are corn, potatoes, sunflowers and millets, oats or barley sown in triple rows.

The first mentioned of these crops is possibly, from the data available the most suitable of all, as the results of ten year's experiments at Indian Head and Brandon show that under field conditions, wheat after corn will, on the average, out-yield wheat sown on fallow. The experiments at Saskatoon confirm this fact and also show that corn can be successfully grown over a much wider area than is generally believed. In addition to being helpful in preventing blowing, the corn crop produces a large tonnage of valuable fodder, per acre. It would not be feasible to plant the entire summerfallow in fodder corn to be cut and either put into the silo or stock up for winter, on account of the labour necessary, but by planting part of the acreage in the early maturing squaw types of corn these can be profitably pastured off by cattle and hogs and will provide excellent feed for the first of September until late in the fall.

A limited acreage of potatoes forms another profitable substitute for fallow and the grain crop following will yield almost as well as after fallow. With modern machinery and methods a reasonably large acreage of potatoes can be grown and the profit per acre is usually large. An early maturing potato is desirable in the West and the area planted should be all in one variety so that the resultant crop will be more readily saleable.

Ruban sunflowers produce a large tonnage per acre but the following grain crop is possibly not as good as that after corn. Definite information on this point is not available as yet, however. The sowing of millet, oats or barley in triple rows with three feet between each set of rows has been successfully used in the States and the resultant crop may be either cut or pastured. In formation regarding the following grain crop is meager, however, and more experimental work will have to be done in this regard before the full value of these crops handled in this way is known.

One of the fundamentals of our government is free speech, and yet we allow our chautaukers to charge a couple hundred dollars a lecture.

LOCAL NOTES

BORN—To Mr and Mrs Prior of Gilt Edge, on Sunday, April 24th, a son—Congrat!

W. V. Lawrence was a week end tripper to town. He came through from the city by auto.

Bill Pigeon informs us that on Monday one of his hens was out to beat the record and laid an egg measuring 8 inches by 6 1/2 inches some egg, we'll say!

The Presbyterian L. A. are arranging to hold a "Japanese" tea in the G. W. V. A. rooms (next Washburn's) on Saturday next from 3 till 10 p.m.

We are glad to know that the Anglicans and Presbyterians of town are joining forces in the boy scout movement.

Mr M. W. Misener, piano tuner of Edmonton, will visit Wainwright about the second week in May. Orders can be left at The Star office. First come first served.

The "Walter Musson" Chapter I. O. O. F. will give a dance on Friday May 6th at 8.30 p.m. for the purpose of adding to their fund for a memorial to the boys who fell in the Great War. Tickets: \$2.00 for gentlemen, 50c for ladies; these including lunch.

After a week spent in the city, Mrs W. Yeager returned home on Sunday.

A celestial phenomenon occurred on Thursday night in the visibility of a full eclipse of the moon. Of course, very few of our good citizens saw this—only the "stay-up-lates".

Mr and Mrs Fred Aykroyd, who have been spending a holiday in the east returned home on Sunday last.

Mr Geo. Harper, our genial depot-agent left for his vacation on Thursday last. Before returning he will visit at St Thomas, Ont., and other eastern points, and rumour hath it he will return in double harness. Well it is a nice place for a honeymoon, George, but you might have told us whether such is the case.

Mr M. B. McLeod formally took over the Dawson farm on Friday last.

We learn that the bass drum which was presented to the boys of the 151st went from here by the Wainwright U. F. A. is now back and in possession of the original user Mr Alf Cook.

Don't forget the big opening of the U. F. W. A. restaurant on Saturday, May 6th Tea and refreshments will be served.

Col. F. S. McFarlane who is lecturing on the new Red Cross enrollment feature is arranging to speak here in the immediate future.

We would remind many of our citizens that by getting the banking away from their premises as soon as possible they will greatly mitigate the fly trouble later on.

Horsemen get your route cards and horse breeders' lien notes at The Star office.

Mr Frank Bell was spending a few days in the city on business this week.

Mr W. E. Zinkan was a business visitor to the city last week returning home on Friday's train.

IMPORTANT NOTICE

We have The Deltor

A revolution in dressmaking velvety with Butterick patterns. has come.

THE DELTOR is the one greatest invention for serving women since the paper pattern and the sewing-machine, and this store has it.

THE DELTOR does nothing less than make an expert dress-maker of any woman.

In bringing THE DELTOR to you, this store knows that it has done one of those things which will be a milestone in the history of service to the public.

THE DELTOR is the great invention of Butterick.

It is very, very simple.

It is nothing more or less than a printed picture-story showing every step of fine dressmaking, from cutting to the last stitch.

It is enclosed in the en-

The picture-story shows:

1. Exactly how to lay each piece of the pattern on the cloth so as to cut without waste and with the right "grain" of the cloth.

2. Exactly how each piece, when cut out, fits to every other piece.

3. Exactly how to finish the garment with the professional touch of detail that is the very character of a lovely garment after it is complete.

For your particular size and for the material you should use, **WHATEVER ITS WIDTH**, there is the particular DELTOR for your individual need.

One make of pattern, and one make only, carries THE DELTOR—The Butterick—enclosed with it in its envelope. Butterick, the style leader of the world.

Agents for Butterick Patterns and The Deltor

Note

The Management of this paper claims that Advertisements herein are widely read. To test this out, and knowing that every woman can use a pattern, we are making the following offer

Use This Coupon

Good for one-half of the purchase price of Any Pattern in the Store when presented, signed, during the month of April

Headquarters for the Best Coal at the Least Money.

THE IMPERIAL LUMBER CO. LTD.

THE YARD WITH A CONSCIENCE
H. A. CLUTE LOCAL MANAGER
Phone 10 3rd Avenue

Rev. J. B. Thompson of St Andrews church, was preaching in the city on Sunday last. In the morning he officiated at Westminster church and in the evening at Knox church, Mr W. T. Suckling was filling his pulpit here during his absence.

Miss Yvonne Bisson entertained a few of her little friends at her birthday party, last Tuesday afternoon.

After spending the last couple of months in the city, Mr G. L. Hudson, M.L.A. and Mrs Hudson arrived home on Friday.

Mr Chas. Kuntson, of Edmonton, was a business visitor to town last week end. He was accompanied by Mrs Kuntson.

Mr G. L. Cross, was a week end tripper to the city on business.

Smiles are contagious, but don't infect for them.

Mrs Glen Johnson is leaving on Sunday to spend a visit with her mother in the old home at Spokane, Wash.

Mrs Jas McCafferty was up from Edmonton last week end on business.

Mr Alf Aiken, of Heath, was a business visitor to Edmonton last week end.

Mr G. Cross who was in town visiting his brother George, left on Monday last for the west.

Mrs E. S. Graham, is leaving town for a visit with friends and relatives at Spokane, Wash.

Things must be looking up! Bill Blinn's team looks real sporty in their brand new harness.

No person can possibly serve two masters, so it beats all what a man wants with two wives.

Mr T. R. Tobin, from Edmonton is acting as relieving agent at the depot during the absence of Mr Geo. Harper.

The builders are getting busy now and preparations are being made for the new foundation under the W'ght Pharmacy building.

Mrs Percy Crompton and her two children arrived on Thursday last from Lincolnshire, Eng., and is staying with Mrs T. Lissimore.

Sure signs of Spring! The Red Cross Pharmacy is advertising the opening of its ice-cream parlor, so a "Sunday" is in order any day of the week!

Express rates are so high that the common people can't even afford to express a wish that they be lowered.

Sympathies are being extended to master Gordon Kenny, who while playing "ball" at the school suffered a real nasty blow full in the eye from a "fouled" ball.
